## Summary Table <br> Common Pool 1st Trimester Quota Period: Catch Monitoring

Report run on:
For data reported through:
May 302013
May 222013

2013
May 1, 2013 to April 30, 2014

Based on a clarification by the Council, starting in FY 2013, if a vessel fishes any portion of a trip inside the Eastern U.S./Canada Area, then all cod, haddock, and yellowtail flounder caught on that trip will be counted against the Eastern U.S./Canada TACs for cod and haddock, and the U.S./Canada TAC for GB yellowtail flounder inseason, regardless of where the fish are caught. All other species caught on these trips will be apportioned to the area caught as recorded on vessel's VTRs.

Because of remaining implementation issues associated with this measure, we are soliciting additional comment on this requirement in the FW 48 interim final rule. For more information on how to comment, please contact us at (978) 281-9315.

| Stock | Cumulative Kept (mt) | Cumulative Discard (mt) | Cumulative Catch (mt) | Sub-ACL (mt) | Percent Caught |

## Notice

The 2013 Quota Period began on May 1, 2013; therefore this report does not contain any landings reported prior to May 1, 2013.

Management actions for the Common Pool Program, under the authority of the Regional Administrator (such as closures and possession limits) are based upon Vessel Monitoring System (VMS) reports and other available information.

National Oceanic and Atmospheric Administration

These data are the best available to NOAA's National Marine Fisheries Service (NMFS) when this report was compiled. Data for this report may be supplied to NOAA Fisheries Service (NMFS) from the following sources: (1) vessels via Vessel Monitoring System; (2) Vessel Trip Reports; (3) fish dealer purchase reports; and the (4) NOAA Fisheries Service Observer Program, through audited observer reports submitted by the Northeast Fisheries Science Center. Data in this report are for landings made through May 222013 and may be preliminary. Differences with data from previous reports are due to corrections made to the database and updates to observer data.
