

Northeast Regional Ocean Council Opportunities for Collaboration

NEFMC June 2010

**Kathleen Leyden
Director, Maine Coastal Program
NROC Chair 2009-2010
kathleen.leyden@maine.gov**

Today's Presentation

- 1. Overview of NROC**
- 2. Intro to Coastal & Marine Spatial Planning**
- 3. Interim Framework on CMSP
(State and Regional Perspective on CMSP)**
- 4. Opportunities for Collaboration
between NEFMC and NROC**

Not Today's Presentation

- **Personal Disclaimer**
- **Details re: CEQ Interim Report**
- **Involvement of fisheries in CEQ framework**
- **Implementation of CMSP -- Legal framework around CMSP**
- **The final word**

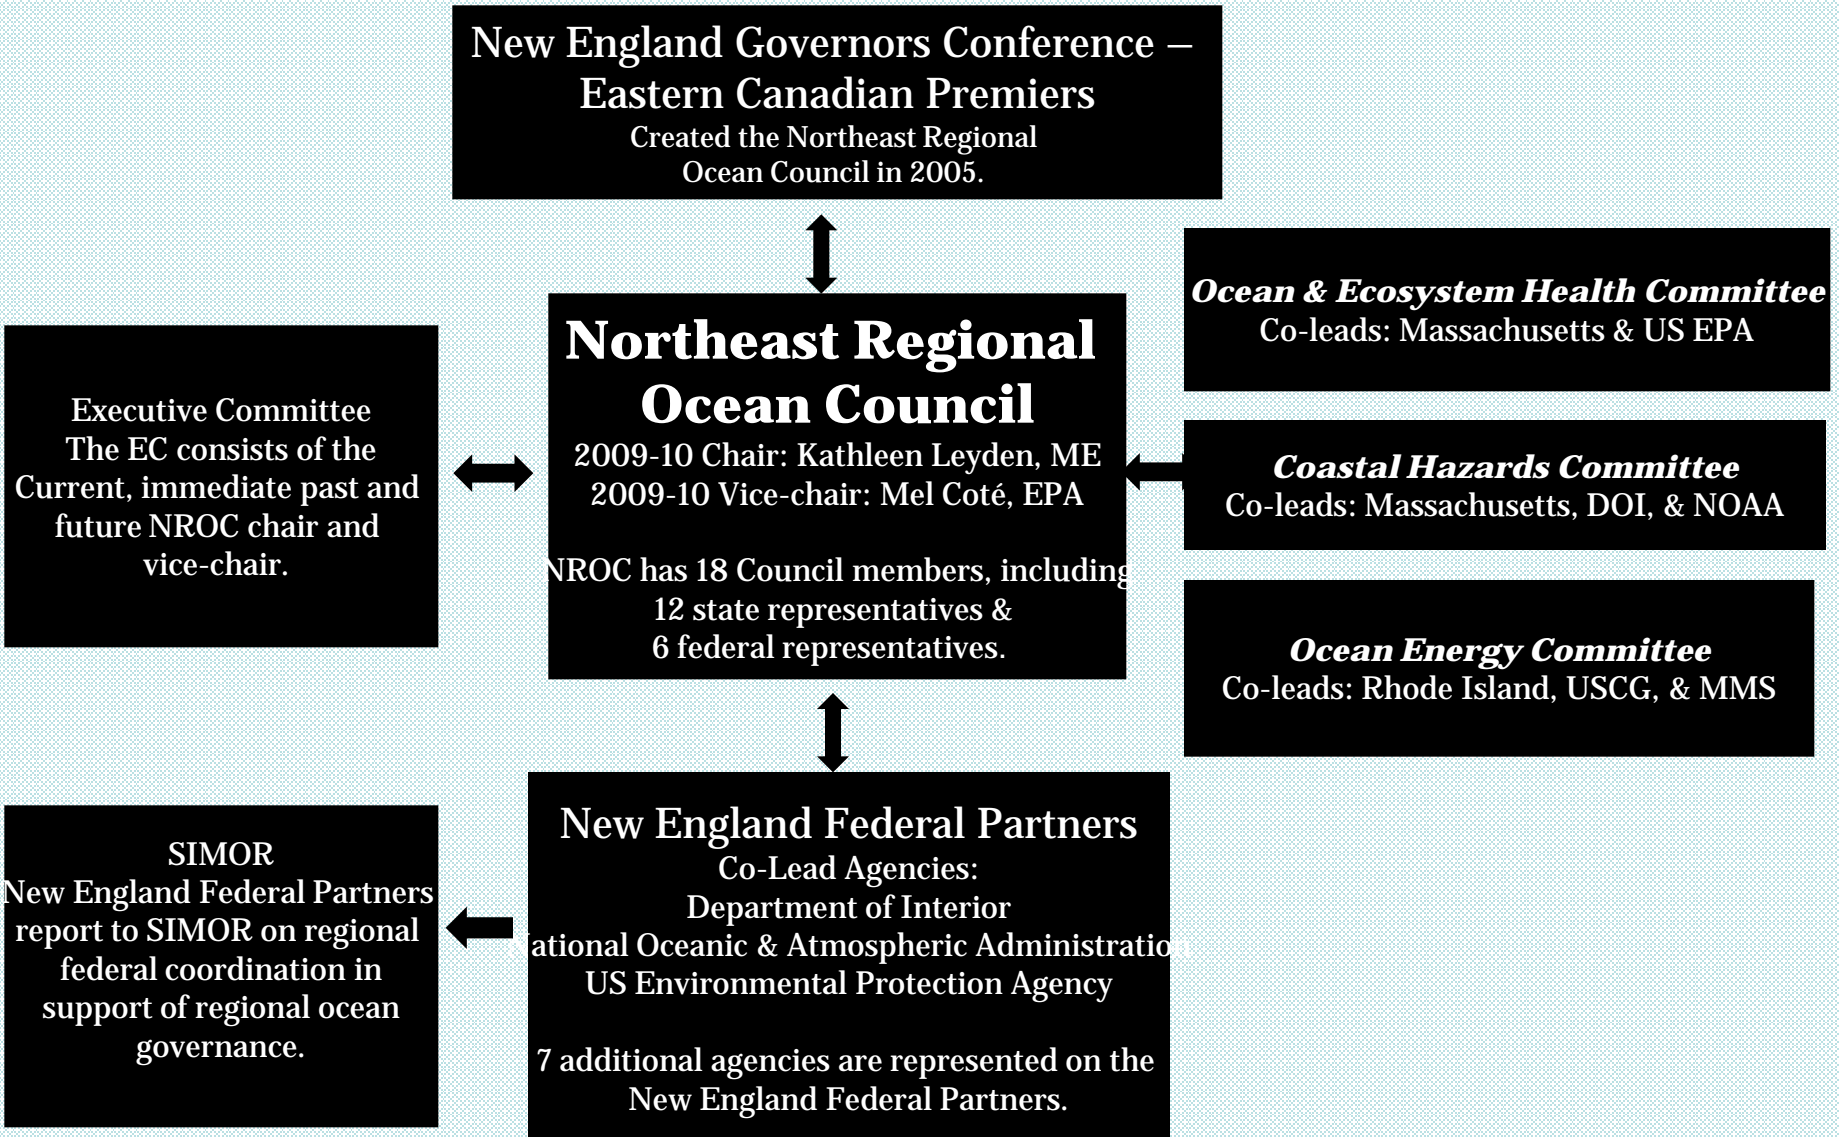

NROC Origin and Purpose

- US Commission on Ocean Policy
- Northeast states (VT, CT, RI, MA, NH, ME)
- Develop **regional goals and priorities** and implement **coordinated and collaborative responses** to coast/ocean issues and challenges that are inherently **regional**.

Current NROC Membership

- **ME CZM & ME DMR**
- **NH CZM**
- **MA CZM and MA Technology Collaborative**
- **RI DEM & CZM**
- **CT CZM**
- **EPA**
- **NOAA CSC, NMFS, NEFSC**
- **DOI: USGS, MMS, NPS, USFWS**
- **USCG**
- **ACOE**
- **USDA-NRCS**

NROC Organizational Structure

SIMOR Role

SIMOR to serve as champion as NROC moves forward, especially on those actions that require:

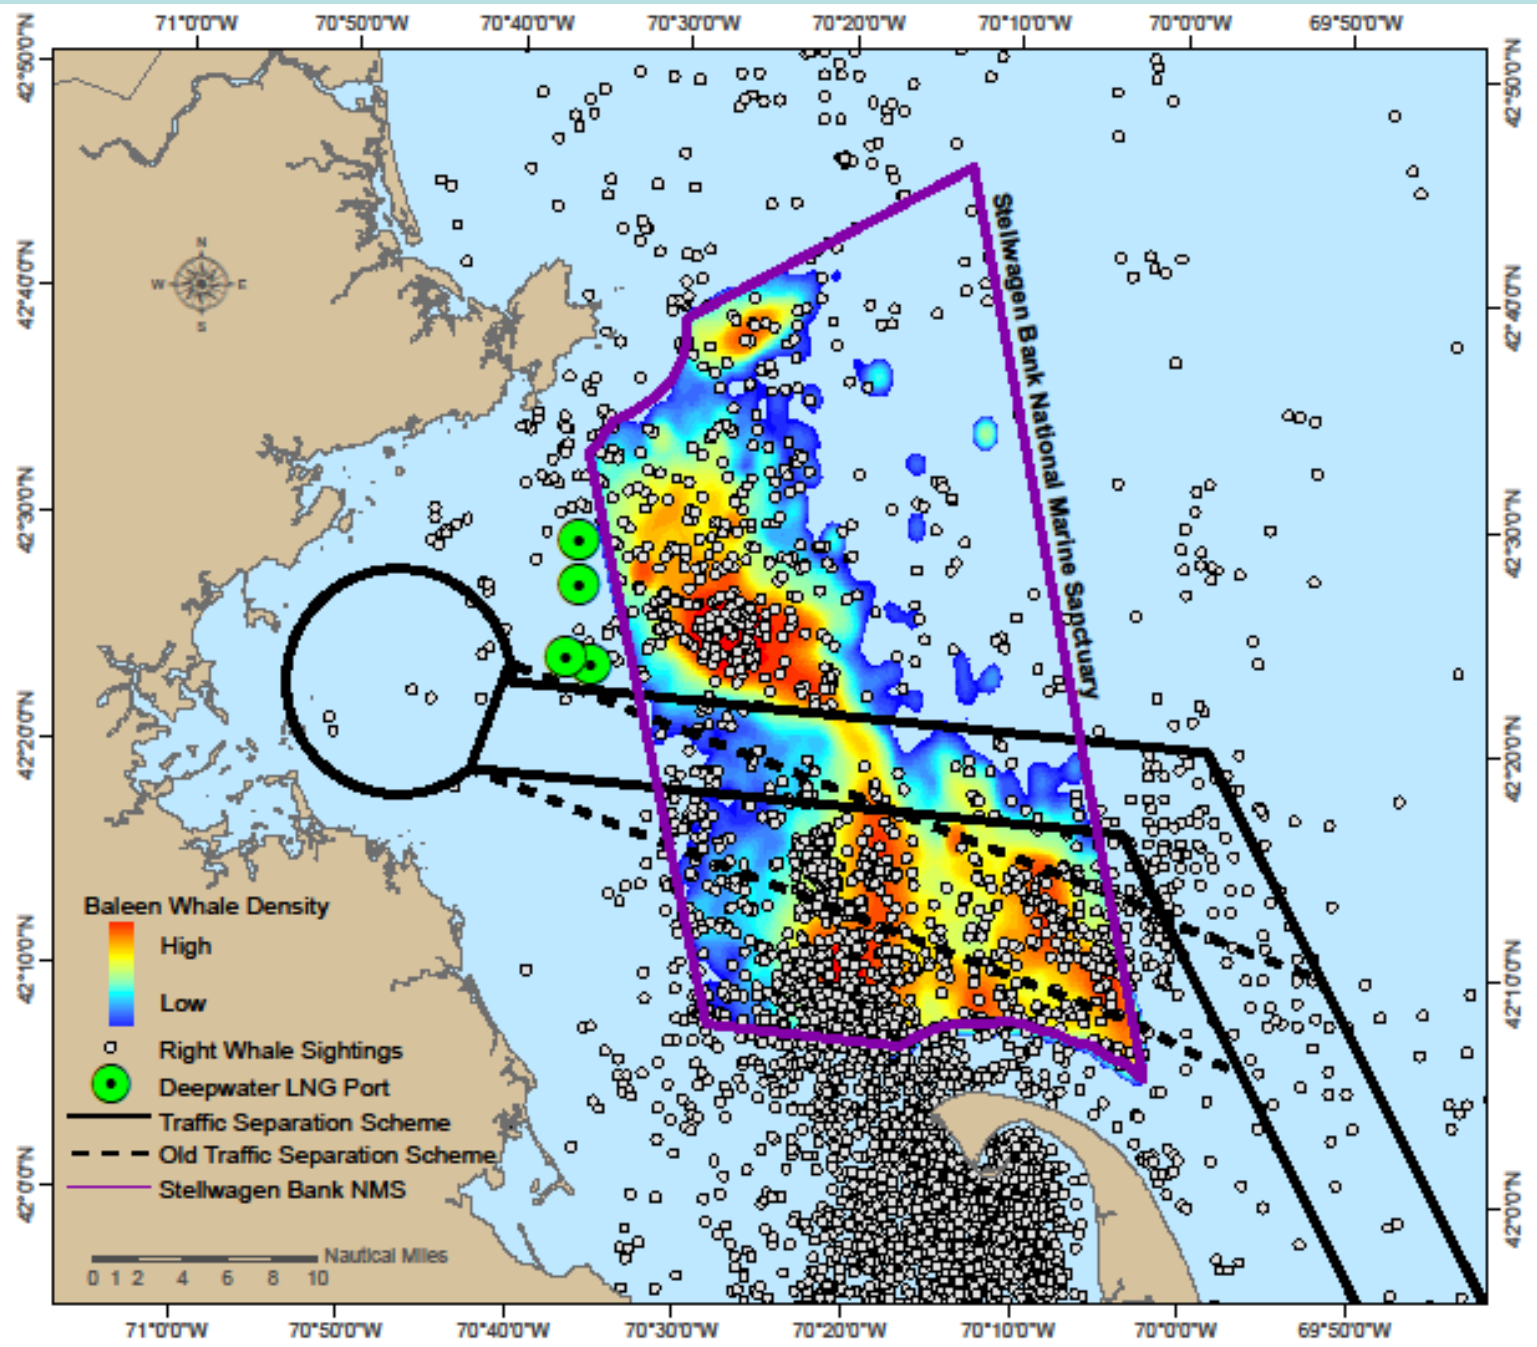

- **changing way federal agencies do business via improved coordination**
- **jointly supported projects**
- **streamlined processes**

SUCCESSSES

- Improved state/federal **relationships**
- **Alignment** of priorities and resources
- Increased **visibility**
- Formal **partnerships**
- **Workshops** – hazards, LIDAR, marine spatial planning, indicators
- **Influencing** MSP implementation/nat'l policy
- \$\$ Regional LIDAR proposal
- **Partnership** with other ROCs

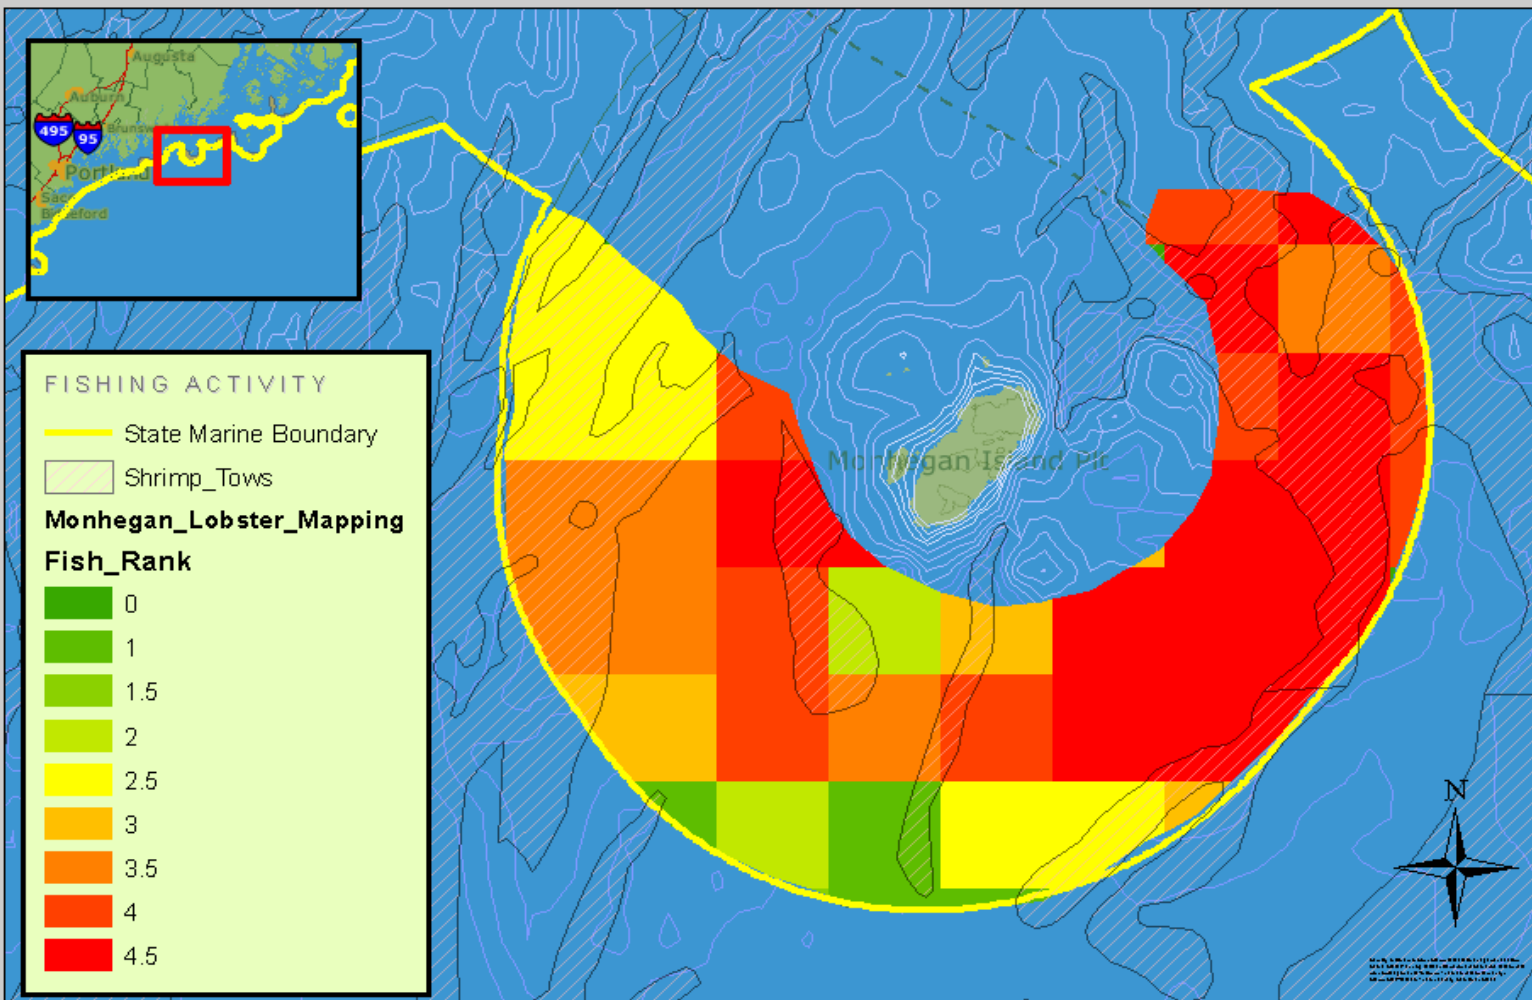

Marine Spatial Planning

**(using spatial data to plan
and manage)**

PLANNING AREA C: MONHEGAN ISLAND AND ADJACENT WATERS PROJECTED FISHING ACTIVITY

Figure Appendix 3-7 Exclusionary criteria

-  Planning area boundary
-  Prohibited area
-  Exclusionary criteria

Map coordinate system: North American Datum of 1983 (NAD83), Massachusetts State Plane Coordinate System, Mainland Zone (FIPS zone 2001), meters.

- State lead
- Intensive efforts
- Need federal collaboration
- Do not involve changing fisheries management
- Lots of questions about implementation

Fisheries and State MSP Efforts

- Intensive fisheries outreach, using interactive GIS
- Attempt to identify important fishing areas, predominant travel routes
- Minimize conflict to fishing industry
- Acknowledge complexity of resource and use (seasonal, market, quotas, etc.)
- Incomplete information, subject to continuous change

Presidential Directive

- **National Ocean Policy**
- **Framework for MSP**
- **Anticipated final framework and Executive Order**
- **Budget – Federal agencies and competitive grants for regions**

Regional Planning Areas

Large Marine Ecosystems

Coastal and Marine Spatial Planning

A planning process, based on sound science, for analyzing current/anticipated uses of ocean & coastal areas. It identifies areas most suitable for activities in order to:

- reduce conflicts among uses,**
- reduce environmental impacts,**
- preserve critical ecosystem services**

A public process for people to better determine how the ocean and coasts are used/protected.

Other Characteristics

- **Transparent process**
- **Multi-objective – intended to address economic, environmental, security, and social needs regarding ocean and coasts.**
- **Comprehensive, adaptable, integrated, ecosystem-based**

Input Provided by NROC/States

- Respond to regional objectives
- Address capacity and data needs
- Start small (not out to 200 nm)
- Simplify
- Be flexible
- Create incentives to participate
- Consider NE as a pilot, build on all existing efforts

Heard on the Street

- “Old wine in a new bottle”?
- An approach supported by “naïve zealots” in the conservation community?
- A shift towards top-down management?
- Drawing lines in the sea?

An Opportunity?

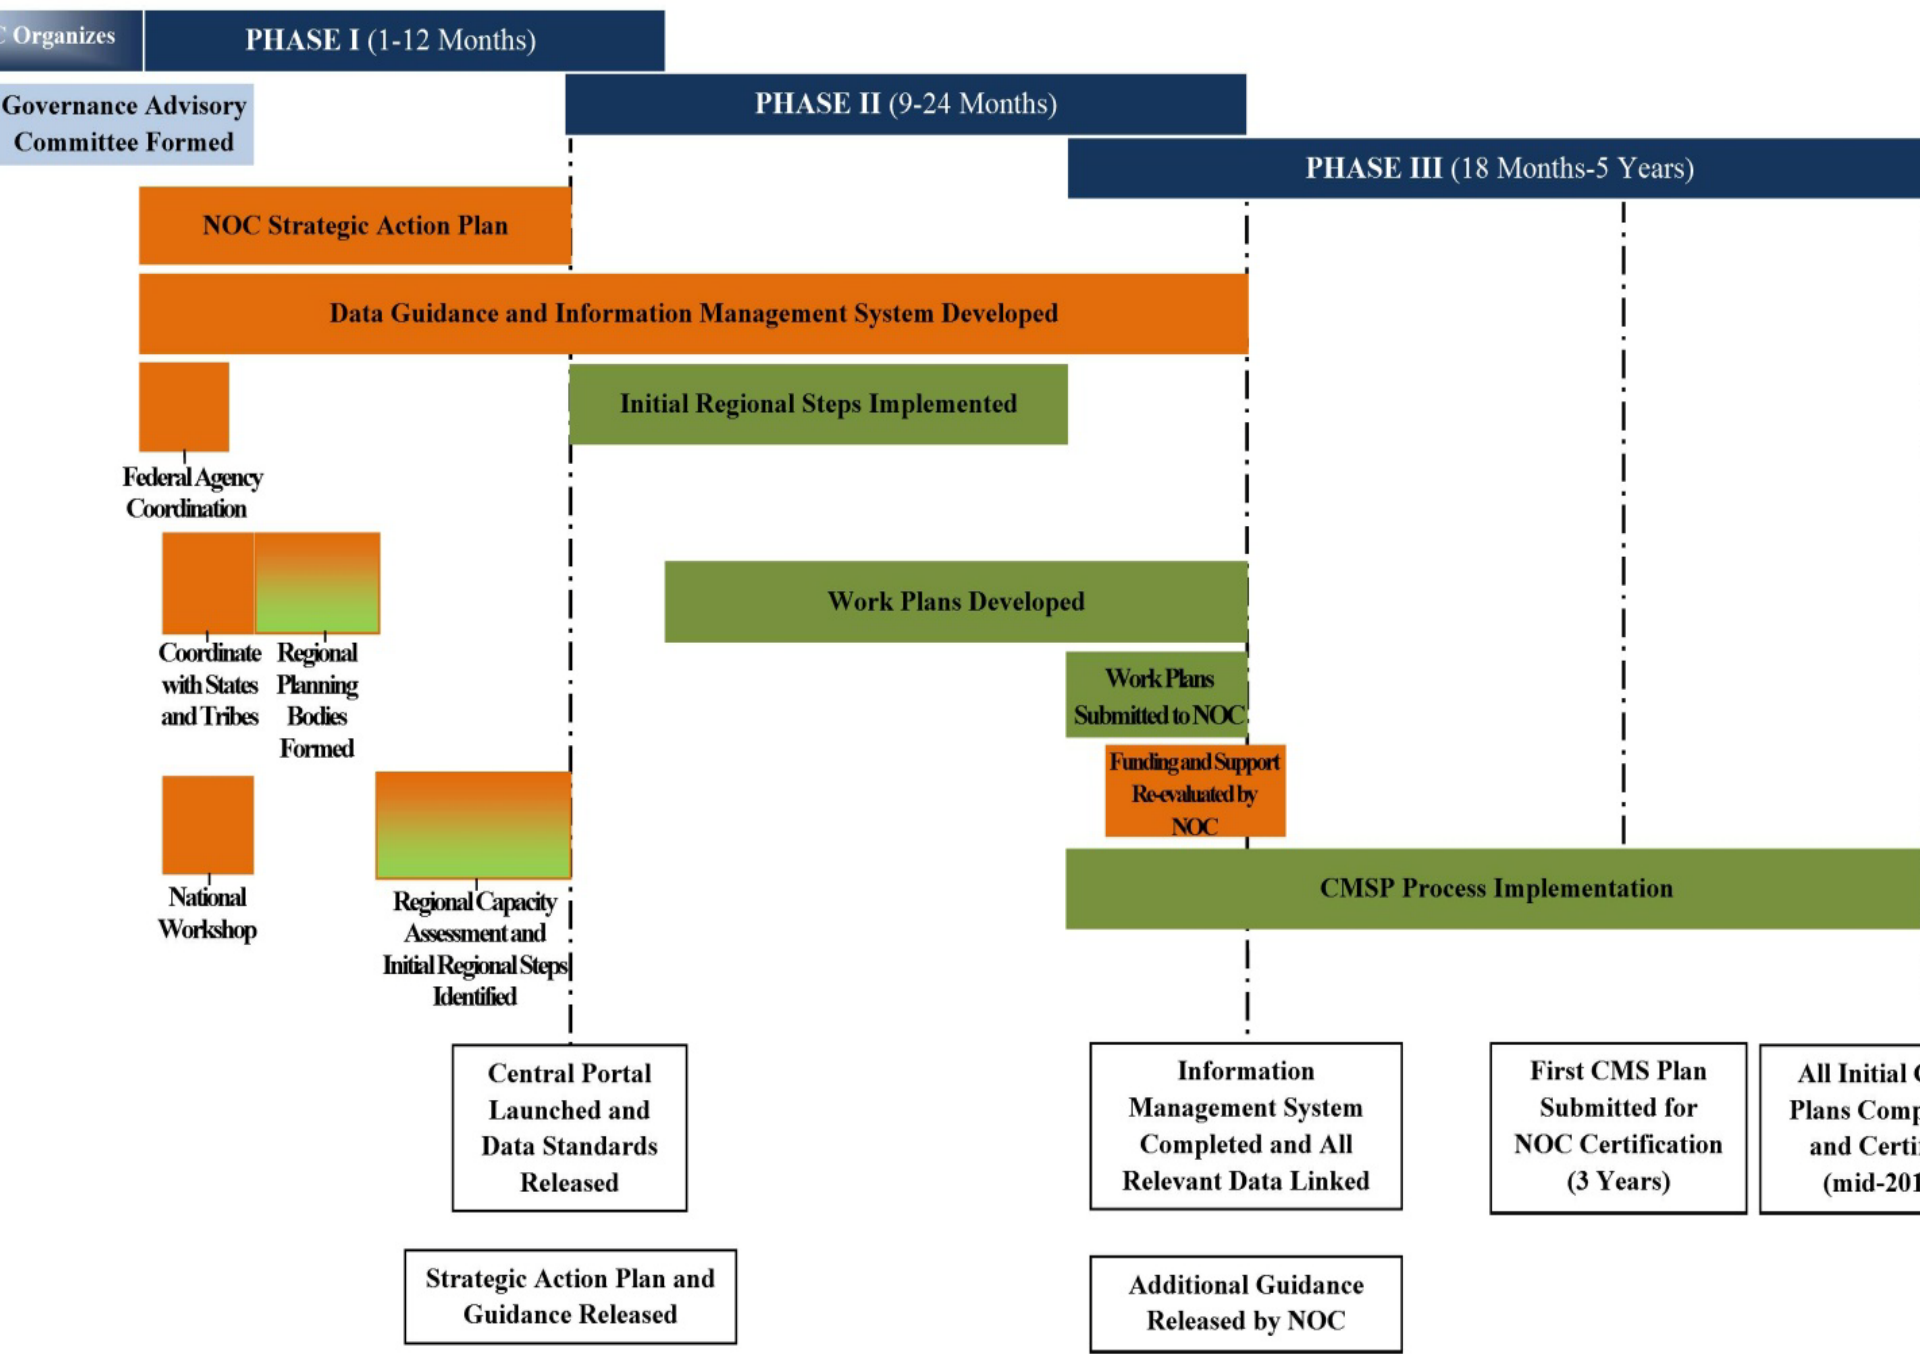

- Much needed state/federal coordination
- Looking at best available data to understand the implications of current siting of facilities/uses in the ocean
- Tailored to each state's and region's needs with a flexible outcome.
- Not an end-point in itself. End points could be successful ocean energy siting, protection of fishing areas from other uses, etc.

Initial Steps

- **Establish Regional Planning Body**
 - Established by NOC (w/states, Tribes)
 - Interests relevant to CMSP for region
 - Adjacent countries and states (ex officio)
 - Empowered to make decisions
- **Development Agreement**
- **Decision-making**
- **Work Plan**

Planning Process

- Objectives
- Existing Efforts
- Stakeholders
- Scientists
- Analysis
- Scenarios
- Draft
- Final
- Monitor, evaluate and modify

NROCC and CMSP

- Leading the nation
- Work to date:
 - Workshops/meetings
 - Human use inventories
 - Data gaps analysis; regional data portal
 - Defined (new) information needed (birds, etc.)

Opportunities NEFMC/NROC

- **NROC Ecosystem Health subcommittee**
- **Share habitat characterization expertise**
- **Assist in accurately characterizing fishing**
- **Participate on CMSP science advisory committee**
- **Fall workshop**
- **Maintain this dialogue**
